	Action Summary	•					

U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/389393

Art Unit: 2815

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3,5-8,10-13,15-18,20-28, are rejected under 35 U.S.C. 102(b) as being anticipated by Lee '320.

The previous rejection still applies. The recitation "thinner" does not structurally distinguish over Lee where in figure 7 the first electrode is "thinner" in at least one dimension than the second electrode.

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3,5-8,10-13,15-18,20-28, are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Takenaka '214.

Insofar as applicant intends "thinner" to mean the vertical dimension, Takenaka appears to anticipate or at least make obvious applicant's claimed structure.

5. Claims 1-3,5-8,10-13,15-18,20-28, are rejected under 35 U.S.C. 103(a) as being unpatentable over Takenaka in view of Lee.

Art Unit: 2815

From Lee it would have been obvious to have practiced gate oxide sidewalls including the same metal as the gate electrode for ease of processing and design improvement, in a structure as Tanaka with thick and thin gates layers. Applicant's claims are obvious structure.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 7. Claims 1-3,5-8,10-13,15-18,20-28, are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 5,973,378. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to a TFT structure with one gate layer thinner than another.
- 8. Applicant's arguments filed 20 October 2000 have been fully considered but they are not persuasive. The new recitations are not patentable for the reasons discussed above. In addition, the bottom gate design is not patentable because it does not strucutrally distinguish over the prior art as viewed "upside down". The claims are broadly recited.

Application/Control Number: 09/389393 Page 4

Art Unit: 2815

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication should be directed to B.W. Baumeister at telephone number (703) 306-9165.

Jeroma Jackson, Jr. Primary Examiner
